

Atlas Turner

Penny and Gary Turner

BARC'S ATLAS TO THE RESCUE

Atlas has a happier story than a lot of the rescues we've been involved with. Atlas is 8 years old and originally from a breeder in Oklahoma. His original family didn't want him anymore and a family member took him. His current family then had kids and didn't have time for him. He's been living in a pen in the garage, we don't know for how long. We just happened to be talking to someone and mentioned we did Berner rescue. They told us of this family that wanted to get rid of their Berner. We contacted them and made arrangements to get Atlas. The owner said he was pretty dirty and would have him groomed. When we picked him up, his whole underside and under his chin had been so matted they shaved him. He was also skin and bones. I noticed he was drinking and peeing a lot so we had blood work done. He has kidney issues and will be rechecked to see if the meds he's on is helping. So, because of his age and kidney issues he'll be staying with us to live out his time.
