

“SAMSON” TACKETT

BGF ID#22119

Samson is a BARC 2nd rehome, living for a year with the Johnson family in Georgia. It was while attending the CVBMDC Draft Test in April 2006 that I first met and fell in love with Samson. When the need for Samson’s rehoming came about, Chattahoochee Valley club members Ron & Kathleen Loudin helped transport him to me, meeting me near Jackson, MS on August 30, 2006. Samson is in the AKC Stud Book, which means he sired at least one litter while in the puppy mill situation. We have no way of knowing how many litters he actually sired before being rescued by BARC. Upon coming to my house, he was OFA’d at 51 months of age, showing Moderate HD in his right hip and clear elbows. Samson walked into the Tackett household making himself right at home displaying his easy going nature and great personality. At that time, I could not have known that in just a few short months I would be faced with the reality of having to put my other BARC baby, Lucille, to sleep due to her escalating dog aggression issues. Samson’s smiling face and happy presence helped me get through the dark days after losing Lucille. While I generally do many working activities with my dogs, due to Samson’s HD, he will be my couch potato extraordinaire, which is just fine with me!

Owner: Pat Tackett, Texas
